

AI Navigator

Helping you strategize, plan and de-risk your AI project

From concept evaluation to system architecture design, this service provides organizations with the necessary tools and insights to confidently move forward with AI initiatives or drop them before any damage is done. No risk, no strings attached.

WHAT YOU GET

- Refined project scope document:
 - functionalities overview
 - technology recommendations
 - system architecture design
 - user path
- Risk board summing up:
 - what we don't know
 - what can cause problems
 - what should be tested first
- Cost breakdown:
 - project phases,
 - timelines,
 - resources needed
- PoC project scope

WHAT YOU GIVE:

- Problem statement and business goals
- Data flow overview
- Reference systems/solutions
- Availability to talk to us
